# Repower America

100% clean electricity within 10 years

---

Dear Lupe,

Thanks to your generous donation, the latest Repower America ad aired last Sunday on CBS's *60 Minutes*. Because of this, millions of people saw the rancher standing next to the giant wind turbines repowering America. Projects like these can provide our nation with 100% clean electricity within 10 years if we keep up the momentum. And we will create new jobs, improve our national security, and solve the climate crisis. It's a powerful message that we'll spread far and wide in the new year.

Please let your friends and family know you supported this ad. Just use **this simple tool to pass it around**.

Thanks again for your continued support. Together, we can Repower America.

-Cathy
