The Digital Campus

The Digital Campus serves Fresno State students, faculty, and staff by providing access and support for Blackboard — an online course management system used for delivering dynamic, interactive online courses and for fostering online communication for campus organizations.

Whether here on campus or located remotely in the region or overseas, enrolled students can participate in the Digital Campus experience by taking either Web-enhanced courses that supplement the traditional classroom experience or Web-based courses.

Blackboard

Digital Campus online courses are delivered through Blackboard, a powerful Web-based e-Learning portal system. Students have access to the Digital Campus with a single login at <http://blackboard.csufresno.edu/>.

Students have 24x7-access to Blackboard in order to do the following:

- View or print syllabi and lecture notes
- View video and audio provided by faculty
- Engage in discussions with fellow students
- Meet faculty and students in a virtual classroom
- Submit assignments via the Digital Drop Box
- Take quizzes and exams online
- Check grades

Course Catalog

A listing of courses hosted by Digital Campus is available by going to <http://blackboard.csufresno.edu/> and clicking on the Course Catalog button. The courses listed use Blackboard to enhance or replace traditional face-to-face instruction. Some courses allow guest access by providing a Preview button.

Here to Help

In the fall semester of 2004 more than 18,000 students and 600 faculty participated in Digital Campus online courses. The Digital Campus provides training for students, faculty, and staff through workshops, one-on-one consultation, and drop-in assistance. Digital Campus is located on the third floor of the Industrial Technology building. The staff of instructional designers, trainers, technologists, and production assistants are available to help.
