

AMERICAN LIVING

Those old enough to attend high school (16 and over) ought to be able to realize a tremendously important problem we all are facing. After the war is over, we may have to encounter far greater difficulties than ever before and increased racial prejudices. It will be up to us to prove ourselves "Americans" in every sense of the word. x

The purpose of the educational program to be held on Tuesday and Thursday evenings will be to spend some of our spare time more profitably, preparing and acquainting ourselves for what lies ahead; to stimulate and help us retain our former interests and ambitions; to keep our faith in and hopes for a better and greater America; to become more appreciative of; and better acquainted with American customs, traditions, and attitudes so that we can more sincerely feel we are part and parcel of America, our country, home and future.

(Printed in the May 25, 1942 "Bulletin"- - The forerunner to the regular newspaper of Fresno Assembly Center which was named "The Grapevine")

OUR COMMUNITY

In our Center self-government is progressing very successfully to a gratifying degree.

Various activities have been planned for our benefit with vim and enthusiasm.

A newspaper has been established, religious and medical facilities have been provided for the people here.

A library and educational programs are being organized for our leisure moments.

In order to have an efficient and smooth functioning community, it is necessary to discuss our problems in the spirit of mutual co'operation. Furthermore, with the help of proper authorities, solutions may be worked out. Consequently the community will be harmoniously co'ordinated, and self-government will have served its purpose.
