

San Francisco Examiner
Monarch of the Pacific
Supreme in Everything

July 28, 1924.

Dear Miss Morgan :

Mr. McGregor telegraphs :

Spanish wooden door measurements are-- Height over all
10'4". Width over all 5'8". Inside measurements are--
Height 6'6". Width 2'11".

Mr. Hearst instructs me to tell you he contemplates
using this in rear of the big house.

Answering your letter of the 23rd on finances-- Mr.
Hearst instructs me to ask that you arrange for deferred payments so
as to stretch them over as long a period as possible.

"There is a distinct objection to paying out a lot of money
this fall," Mr. Hearst says, "as I have commitments for a lot of other
things and do not naturally want to run taxes too high."

Mr. Hearst is glad to note Mr. Rossi's curtailment of
expenses and is confident that you will be able to arrange so as to
keep with the monthly allotment, especially as cutting down sharply later
would enable you to take care of these deferred payments within the year.

Sincerely,

Secretary to Mr. Hearst.

P-S Mr. Hearst also says that "we
want to ~~make~~ it as comfortable and
pleasant for Mr. Webb and Mr. Keep
as we can-- keep them satisfied and
happy-- as he would not want to lose
either one of them." This has special
reference to their living quarters.
