

754 Fourteenth Street
Oakland - California -

Dear Helen:—

Wednesday there was time to go over to East Oakland - to call on Mrs Hill who was fortunately home - Two of the children had whooping cough - so their grandmother Hill kept them from the room - Mrs Hill is not much shorter looking than when she first came over - I did have a good time however while in the East - It was all new to her - They expect to go back to Japan in November - She asked all about you and so much regrets that you were not here when she was - (long kisses) -

Another afternoon we called - met on Mrs Torace Watson - who is very talky - She is plenty pleasant - has twenty two cats in the yard and one house felina which ought to be enough - was so swift Ma -

Sheffield Saborn gave up some of his ideas in a lecture one morning this week - The room is so full of echoes it is most difficult to distinguish words - We shall see more of him hereafter - So far school has not been sulking -

Bessie came Thursday to get any house articles possible for the new residence out at Dimond - She appears

perfectly satisfied and confident that
Mr. Humequin will succeed in raising
a museum.

Arthur is here to-day - I don't know
whether it bothers Ma - he is shut off
in Hart's room so ought not to seriously

I am glad you have actually got out
away from Paris - Hart & I thought we
had had enough country when we
returned from the last trip - but
yesterday we found it would be
pleasant to start again -

All are well here - Ma is no worse -
about the same - She eat poorly which I
do not especially wonder at as three
years of Daylin's handwork tends that
way - Fortunately she gets the doctors once
or twice a week which makes one feel
that she is having care - I do not want
to unnecessarily alarm you when I write
this way - but still I would want to know
just about how she is myself -

I hope all goes well with you -
With much love to you - and "regards"
to Ann if she is with you -

ta soella
Emma
