CENTER FOR INFORMATION PROCESSING

The Center is organized to serve all information processing and computation needs of the university including instruction, research, and administration. It provides a variety of direct and indirect free services to students. Consultants are available in the Instructional Laboratories to give assistance in the use of facilities and computer programming. The laboratories provide timesharing terminals, keypunches, and sorters. Approximately 25 percent of the students now make substantial use of the facilities. Use of the computers in the instructional program is increasing at a rapid rate. The Center is located in the west wing of the School of Business Building with offices in San Ramon 4. The principal hardware, a CDC 3150, supports most of the major computer languages and, via a teleprocessing circuit, has access to other larger computers and to a statewide interactive timesharing network. A DEC PDP 11/45 Timesharing Computer also provides substantial local support to instructional programs.
