STATE BEACH PARKS - We finally have a firm schedule for completion of the San Buenaventura and McGrath Beach State Parks: San Buenaventura - advertising and bid opening by July 15, 1964; construction to start by August 1, 1964; and completion by January 1, 1965. McGrath - advertising and bid opening by July 15, 1964; construction to start by August 1, 1964; and completion by February 1, 1965. These needed improvements will add to our many recreational assets, will improve our coastal areas, and will enable more people to enjoy these beaches.

EDUCATION - The question of how best to finance public education is a major issue before this session of the Legislature. Many methods have been proposed, but basically, they fall into one of three categories: more state money; county-wide property tax equalization with more state money; and, the Unruh Bill, abolition of most local school districts to provide county-wide equalization with more state money. As I see it, there is no need to do away with our traditional concepts of local control of education. The state should again fulfill its responsibility of providing adequate equalization aid. The state's share of the total cost of education has declined from about 50% to about 37% during the last ten years. This percentage should be increased. I have introduced a bill, S. B. 56, which will provide \$75 million in additional state equalization funds. This bill, if enacted, with other increases proposed will provide an additional \$100 million for education. It is a companion bill to A. B. 95, which would have the same effect. If enacted, this bill would provide needed funds for education and would help relieve the burden of the local taxpayer - particularly in poorer districts.

WATER - A. J. R. 2 calls on Congress to enact legislation to clarify state and federal ownership of water rights in California. Recent court decisions have strongly implied that the federal government owns all water originating in or flowing across federal lands. If true, the California Water Plan and many of our water resources are in grave danger. This resolution was supported by virtually every major water user in California, the Supervisors' Association, The League of California Cities, Attorney-General Stanley Mosk, our Board of Supervisors, and many more. It was opposed by Governor Brown and the Department of Water Resources on the ground that it "might offend the federal government". I voted for this resolution, which was adopted.

TRAFFIC SAFETY - I have joined with the Board of Supervisors in requesting assignment of additional Highway Patrol personnel to Ventura County. Because of our extremely rapid growth it is essential that the number of traffic officers be increased to help reduce traffic congestion and accident rates.

GEORGE GRIMES - On March 9th, I introduced and the Senate unanimously adopted S. R. 37, memorializing the passing of George Grimes, editor and publisher of the Oxnard Press-Courier. As was said in the resolution, "the City of Oxnard has lost a great champion, a courageous leader, and a warm and inspiring friend."

Your sincerely,
